Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The Examiner was reversed with regards to the 35 U.S.C. § 102(e) rejection under USPN 5,693,134, Stephens by the Boards of Patent Appeals and Interferences in the decision dated September 20, 2006. The decision in part reads “[w]hile picking and choosing may be entirely proper in making an obviousness rejection under U.S.C. § 103, it has no place in making a rejection under 35 U.S.C. § 102 for anticipation”, (Decision, page 5). As such, prosecution in this case is reopened and a new ground(s) of rejection is made as set forth below.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent no. 5,693,134, Stephens.

Regarding claims 1 and 3

Stephens discloses a pigment comprised of a substrate with a coating of $\text{Cu}_x\text{Mn}_{3-x}\text{O}_4$ (x-1.4 or 1.5), (column 8, lines 20-24, claim 1). The substrate can be made of glass, (column 8, lines 35-37, claim 6). Stephens does not specifically disclose that the coating has a blue color in transmission once placed on a glass substrate.

Although there are no specific examples of the $\text{Cu}_x\text{Mn}_{3-x}\text{O}_4$ (x-1.4 or 1.5) coating placed on glass, it would have been obvious to one skilled in the art at the time of invention to select

Art Unit: 1775

glass as the substrate material as it is clearly taught by Stephens that glass can be used as the material for the substrate. Based upon this obviousness, the coating formed on glass is commensurate with that disclosed by Applicant and would be expected to have characteristics similar thereto, such as a blue coloring.
